The Shift
to an Older Alaska

Alaska's
Native
Population

Alaska's Highly
Migratory Population

Population Estimates: What We Provide

- Annual state, borough, census area, city, census designated place, census tract, and other special area population estimates.
- State, borough and census area estimates by age, sex, race and ethnicity.
- Estimates by age and sex for cities and places of 1,000+.

Population Estimates: Uses

- The population estimates are used for a wide range of purposes, including:
  - Distribution of resources
  - Survey weighting
  - Research and planning
  - Updating of population projections

2020 Census: Importance

- Redistricting (state and federal).
- Funding ("…information the census collects helps to determine how more than $400 billion dollars of federal funding each year is spent on infrastructure and services…").
- Countless statistics go back to the decennial census.

2020 Census: Items On Radar

- Re-engineered Address Canvassing.
- Residency rules/guidelines.
- Public Use Microdata Areas.
- Count Review.
- Geographic programs

  (Participant Statistical Areas Program, Tribal Statistical Areas Program, Local Update of Census Addresses, Voting District/Block Boundary Suggestion Project).

Population Estimates: How We Make Them (briefly)

- For total population we begin with the last decennial census (2010 Census).
- Create ratios of census counts to PFD recipients in the census year, and carry them forward each year until the next census.
- Adjust to a separately estimated state total.
- There are several additional procedures to account for military, prisons, dorms, etc.

Population Estimates: How We Make Them (briefly)

- Race and ethnicity are not included in the PFD data, so we combine our estimates by age and sex with Census data by race.

- Make race data to follow three categorizations:
  - Race alone
  - Race alone or in combination with one or more other races
  - Bridged (1977 OMB)

Alaska Economic Regions

Population Estimates: 2015 Regions

- Overall migration (numbers of in-movers and out-movers) to and from all of Alaska's regions (Anchorage, Fairbanks, etc.) was pretty steady and high.

- Anchorage had the largest population loss (loss of nearly 1,500), and this is the second year of population loss for Anchorage, and it dropped below 300,000 people.

- Mat-Su continued to be the fastest growing area, passed 100,000 people this year, and became the second largest borough in the state.

ANCHORAGE COMPONENTS OF CHANGE

	End of Period Population	Population Change	Growth Rate (Percent)	Births	Deaths	Natural Increase	Net Migration
2010-11	295,908	2,876	0.98	4,772	1,455	3,317	-441
2011-12	298,373	2,465	0.83	4,572	1,457	3,115	-650
2012-13	301,046	2,673	0.89	4,690	1,532	3,158	-485
2013-14	300,366	-680	-0.23	4,783	1,588	3,195	-3,875
2014-15	298,908	-1,458	-0.49	4,644	1,642	3,002	-4,460

MAT-SU COMPONENTS OF CHANGE

	End of Period Population	Population Change	Growth Rate (Percent)	Births	Deaths	Natural Increase	Net Migration
2010-11	91,721	2,040	2.25	1,337	503	834	1,206
2011-12	93,685	1,964	2.12	1,309	502	807	1,157
2012-13	96,022	2,337	2.46	1,340	550	790	1,547
2013-14	98,377	2,355	2.42	1,381	507	874	1,481
2014-15	100,178	1,801	1.81	1,504	577	927	874

Population Estimates: 2015 Cities, Places and Tracts

- Knik-Fairview in the Mat-Su remained the fastest growing community in the state – adding nearly 500 people.

- The City of Fairbanks added nearly 300 people (to its ~30,000).

- Six of the ten places that grew the most in 2014 to 2015 were in the Mat-Su (Knik-Fairview, Gateway, Tanaina, Wasilla, Houston, Fishhook).

Search *Alaska Economic Trends* articles from 1978 to Present

View this year's issues of *Alaska Economic Trends*

Search *Trends* by title/subtitle, author, date range or text within an article

You can search *Trends* archives using all four criteria: title/subtitle, date range, author, full text, or any combination. If you're using full text search, we recommend reading the explanation below.

Search title/subtitle:

*Use spaces between words when searching. The search will return articles whose titles or subtitles contain **ALL** the terms you used.*

Date range: Oldest Year year Month month *TO* Newest Year year Month month

Enter at least the oldest year when searching. All other fields can be left blank. If you're entering a range of years (such as 2000 to 2009), you are not required to choose a month.

Author: Choose author

Authors are in alphabetical order by last name.

Full text search:

The text search is powered by the SOLR platform, and will return articles with any of the words you use unless you include the "AND" operator or place all the words within quotes. Read more about SOLR below.

Search Trends Archives >>

How to use the SOLR text search within an article

SOLR search criteria consist of terms and operators that search text within articles. However, search results can vary because SOLR uses "stemming" to find articles that meet your criteria. Stemming, a computerized algorithm, is used in many search engines to reduce words to their stem or root prior to the search. For example, if your search criterion is "earnings," the algorithm will reduce the search to "earn" and find any article containing the words earn

Migration Data and Information

Migration data for Alaska come from three main sources, each with its own strengths and weaknesses. This means that each source is an indicator of migration, but none provides a complete system to directly track it.

To view the official estimates of annual net migration for Alaska and its regions, boroughs, and census areas, go to our Population Estimates page and see "Components of Change."

Alaska Economic Trends Articles About Migration

PFD-Based Migration Indicator Data

Permanent Fund Dividend (PFD)-based migration data have broad in-state coverage but lag on new migrants from outside the state, because they aren't eligible for the PFD until they've lived in Alaska for one calendar year. Similarly, PFD data do not capture people who don't live here long enough to qualify for a PFD. Maps of these data are available on our Maps & GIS page.

- PFD-Based Migration between Boroughs/Census Areas, 2000-2014 (Excel)
- PFD-Based Migration between Boroughs/Census Areas, 2000-2014 (Interactive)
- PFD-Based Migration To and From Cities and Places, 2000-2014 (Excel)

IRS-Based Migration Indicator Data

Internal Revenue Service (IRS)-based migration data provide direct counts of moves between U.S. counties, boroughs, and census areas by comparing the addresses of exemptions — that is, filers and their dependents — from year to year. However, they only cover about 85 percent of Alaska's population, with particularly low coverage in low income areas, and values below 10 are suppressed.

- IRS-Based Migration To and From Alaska by State, 2000-2011 (Excel)
- IRS-Based Migration between Boroughs/Census Areas, 2000-2011 (Excel)

ACS-Based Migration ("Geographic Mobility") Data

The U.S. Census Bureau's American Community Survey (ACS) based migration data provide population characteristics such as age, sex, race, income, and education. However, ACS is based on a very small sample of the population and tends to have large margins of error. For most areas in Alaska it's only available in five-year averages. ACS data are available on our ACS page, U.S. Census Bureau's American FactFinder, and the U.S. Census Bureau's Geographic Mobility/Migration page.

Census and Geographic Information

Population, Social, Economic and Housing data are collected and tabulated by the US Census Bureau for the decennial census and American Community Survey. Population estimates for years between censuses are published by the Alaska Department of Labor and Workforce Development, Research and Analysis Section.

Census

2010 Census Demographic Profile
Total Population, Age, Race, Population by Household Type and Housing Units

2010 Census Redistricting Data (PL94-171) Summary File
Population and Housing Unit data (based on the 2010 Census boundaries)

1880-2000 Historical Census Data
Population, social, economic and housing data for Alaska and communities (geographic boundaries are as of the census year)

Census Maps
Census boundary maps and GIS data

American Community Survey

Selected detailed social, economic and housing data tables available from the American Community Survey (ACS is an ongoing household survey replacing the traditional long form used in previous decennial censuses). All ACS data are survey estimates and are released annually.

ACS data should be used for information not included in the decennial census data or the Alaska Department of Labor and Workforce Development Population Estimates.

American Community Survey

The U.S. Census Bureau conducts the largest household survey in the United States, the American Community Survey (ACS). Each year, more than 12,000 addresses in Alaska are selected to respond to the ACS. The ACS replaced the decennial census long form nationwide after the 2000 Census.

The U.S. Census Bureau compiles information from household surveys to produce statistics that describe populations and their characteristics, such as age, education, housing and income. This data is collected by asking household members to provide information about the people who live in the house, apartment, mobile home or group housing.

Access ACS data for Alaska here or through American FactFinder.

Select ACS Year Range ◉ 2010-2014 5-Year ○ 2015 1-Year

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Versions of this table are available for the following years:
2014
2013
2012

Source: U.S. Census Bureau, 2010-2014 American Community Survey 5-Year Estimates

Explanation of Symbols:
An '**' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
An '(X)' means that the estimate is not applicable or not available.

Search Datasets

1. Select your desired filters across: Topic, Geography, Industry, Year, Dataset, Survey/Program
2. You only need a geography (United States is the default) to start your search.
3. Click "Search Data" to view results.
4. Tell us what you think.

Unsure where to start? Try an example:

- Topic: Age + Geography: Maryland
- Topic: Disability + Geography: Orange County, California
- Topic: Poverty + Geography: Chicago
