

How to enable JavaScript in a web browser

To allow all Web sites in the Internet zone to run scripts, use the steps that apply to your browser:

Windows Internet Explorer

(all versions except Pocket Internet Explorer)

Note To allow scripting on this Web site only, and to leave scripting disabled in the Internet zone, add this Web site to the **Trusted sites** zone.

1. On the **Tools** menu, click **Internet Options**, and then click the **Security** tab.
2. Click the **Internet** zone.
3. If you do not have to customize your Internet security settings, click **Default Level**. Then do step 4

If you have to customize your Internet security settings, follow these steps:

- a. Click **Custom Level**.
- b. In the **Security Settings – Internet Zone** dialog box, click **Enable** for **Active Scripting** in the **Scripting** section.

4. Click the **Back** button to return to the previous page, and then click the **Refresh** button to run scripts.

Mozilla Corporation's Firefox

By default, Firefox enables the use of JavaScript and requires no additional installation.

Note To allow and block JavaScript on certain domains you can install privacy extensions such as:

- NoScript:** Allows JavaScript and other content to run only on websites of your choice.
- Ghostery:** Allows you to block scripts from companies that you don't trust.

For more information please refer to [mozilla support](#) web page.

Google Chrome

1. Select **Customize and control Google Chrome** (the icon with 3 stacked horizontal lines) to the right of the address bar.
2. From the drop-down menu, select **Settings**.
3. At the bottom of the page, click **Show advanced settings...**
4. Under Privacy, select the **Content settings...** button.
5. Finally, under the JavaScript heading, select the **Allow all sites to run JavaScript** radio button.

Safari browsers

1. In the **Edit** drop-down menu at the top of the window, select **Preferences...**

2. Select the **Security** icon/tab at the top on the window.
3. Then, check the **Enable JavaScript** checkbox.
4. **Close** the window to save your changes.
5. Finally, **Refresh** your browser.

Opera Software's Opera

1. On the **Opera** menu, click **Settings**.
2. Select the **Websites** tab.
3. Click to select the **Enable JavaScript** radio button.
4. Click the **Back** button to return to the previous page, and then click the **Reload** button to run scripts.

Netscape browsers

1. Select **Edit, Preferences,Advanced**
2. Click to select **Enable JavaScript** option.
