INTRODUCTION.

Statistics as to the number of inhabitants of Alaska, for judicial districts, recorders' districts, towns, villages, stations, and forts, without classification as to sex, age, etc., have been published separately in a bulletin entitled "Number of Inhabitants, by Judicial Districts and Minor Civil Divisions." This bulletin gives detailed statistics in regard to the composition and characteristics of the population. The two bulletins cover all phases of the population census of Alaska except occupations, for which topic statistics will be published in a separate bulletin.

This bulletin consists of 22 tables, of which 19 (Nos. 1 to 19, inclusive) give detailed figures for Alaska as a whole and 3 (Nos. 20 to 22, inclusive) give separate figures, in somewhat less detail, for each of the four judicial districts into which the territory is divided. (See map, p. 12.) These tables present statistics as to color or race, nativity, parentage, sex, age, marital condition, school attendance, illiteracy, inability to speak English, dwellings and families, tenure of homes, state or territory of birth, country of birth, citizenship, and year of immigration.

Color or race.—Because of the wide differences in characteristics among the various classes of the population, the statistics on each subject are shown according to color or race. The term "white" as here used refers to pure-blooded white persons. Persons of mixed blood are classified according to the nonwhite racial strain, or, if the nonwhite blood itself is mixed, according to the predominant nonwhite

strain. For example: A person of mixed white and Indian descent or of mixed white and Negro descent is classified as an Indian or as a Negro, as the case may be, regardless of the amount of white blood; and a person of mixed Indian and Negro blood or of mixed white, Indian, and Negro blood is classified either as Indian or as Negro, according to which of these two strains predominates over the other, regardless of the amount of white blood, if any.

Indian stock.—No attempt was made at the Fourteenth Census to classify Indians by tribe, as was done at the Thirteenth Census by means of a special schedule for Indians, but Table 2 (p. 2) and the map following, which were prepared from data supplied by Mr. W. T. Lopp, in charge of the census of Alaska, show the distribution of the Alaskan Indians according to linguistic stock.

Nativity and parentage.—All persons born in continental United States or in any of its outlying possessions are treated as natives and all other persons as foreign born. Classification according to nativity and parentage has not, in general, been deemed necessary for the nonwhite races, since nearly all Indians and Negroes are natives of native parentage, while most Chinese, Japanese, and others are foreign born. Moreover, the numbers of the nonwhite elements, aside from the Indians, are so small as to be of no great significance. In Table 3, however, separate figures as to nativity, and in Table 4 separate figures as to nativity and parentage, are given for each of the several races.

POPULATION—ALASKA.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States or in any of its outlying possessions; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in certain tables; and in some cases all three native classes are combined.

Country of birth for the foreign born.—The presentation of statistics on country of birth for the foreign-born white population for 1920 is made on the basis of the postwar map. Because of the many political changes which have resulted from the war, comparative figures for 1910 for this class of the population by individual European countries are not presented in this bulletin.

Year of immigration.—In the distribution of the foreign-born population by year of immigration, as given in Table 7, the calendar year is the basis of the classification, and the date given is the year of immigration to the United States or to any of its possessions—not necessarily the year of arrival in Alaska.

Marital condition.—The census classification with regard to marital condition covers four groups, namely, single, married, widowed, and divorced. As these terms refer only to the marital status of the population on the census date, a person who had been widowed or divorced but had remarried would be reported as married. The explanation of the much larger proportion single among males than among

females is found in the great preponderance of males in the adult population, and in the fact that women as a rule marry at younger ages than men.

School attendance.—The census inquiry as to school attendance was merely as to whether the person enumerated had attended school, college, or any kind of educational institution at any time between September 1, 1919, and the census date, January 1, 1920.

Illiteracy.—The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write in any language, not necessarily English, regardless of ability to read.

Dwellings and families and tenure of homes.—In census usage a "dwelling" is any building or structure in which one or more persons reside. It may house a single family, as in the case of a private house, or a number of families, as in the case of an apartment building. The term "family" as here used means a group of persons, whether related by blood or not, who live together as one household, usually sharing the same table. One person living alone is counted as a family, and, on the other hand, the occupants or inmates of a hotel or institution, however numerous, are also treated as forming a single family. Thus the census family in some cases differs greatly from the natural family. The structure or part of a structure occupied by each census family is, for census purposes, a "home," and the number of families shown in Table 19 is therefore equal to the total number of homes for which statistics as to tenure are given in that table.

TABLE 1.—COLOR OR RACE, NATIVITY, PARENTAGE, AND SEX: 1920, 1910, AND 1900.
