# ALASKA

## NUMBER OF INHABITANTS

**Population of the Territory.**—Alaska was acquired by purchase from Russia in 1867 and was organized as a Territory in 1912. The population of Alaska on October 1, 1939, according to the Sixteenth Census, was 72,524, which represents an increase of 13,246, or 22.3 percent, as compared with the population of 59,278 on October 1, 1929. The total land area of the Territory, as shown in table 3, is 571,065 square miles. There were 12.7 persons per 100 square miles in Alaska in 1939, as compared with a density of 10.4 persons per 100 square miles in 1929.

Table 1 shows the population of Alaska from 1880 to 1939, together with the increase or decrease during each intercensal period. The first enumeration of the population of the Territory was made in 1880 and consisted of a canvass of all accessible settlements, supplemented by estimates based mainly on records and personal knowledge of missionary priests for those areas which could not be visited. A similar practice was followed in 1890, but the area actually canvassed in that year was larger than that visited in 1880, and at each subsequent census the enumeration has been more nearly complete and accurate. Because of the unusual climatic conditions, the wide dispersion of the small population over large areas, and the inaccessibility of certain regions, the last two censuses of the Territory have been taken as of October 1 of the year preceding the official census date.

TABLE 1.—POPULATION OF ALASKA: 1880 TO 1939

[A minus sign (—) denotes decrease]

CENSUS YEAR <sup>1</sup>	Popula- tion	Increase over pre- ceding census

1890.....	32,052	-1,374	-4.1
1880.....	33,426		

<sup>1</sup> Because of the unusual climatic and geographic difficulties the period of enumeration extends over several months. However, in 1939 and 1929 the population was enumerated as of place of residence on Oct. 1 and in 1920 as of Jan. 1. For the censuses of 1880 to 1910 it is not possible to specify an exact date.

**Geographic subdivisions.**—In tables 2 to 5 the population of Alaska is shown by judicial divisions, recording districts, cities, towns, villages, and other places, with some comparative figures from previous censuses.

**Incorporated places of 1,000 or more.**—There are eight incorporated places in the Territory that had a population of 1,000 or more in 1939. Table 2 shows the population of these cities and towns at each census for which figures are available, together with the increase or decrease at each decade. Juneau, the largest city and the capital of the Territory, had a population in 1939 of 5,729.

## NUMBER OF INHABITANTS

Judicial divisions.—Alaska has no county organization, but in 1909 the Territory was divided into four judicial divisions, which are treated for census purposes as equivalent to county areas. Table 3 shows the

population of these four judicial divisions from 1920 to 1939, together with the land area of each division and its population per 100 square miles in 1939. Each of the divisions increased in population between 1929 and 1939.

Minor geographic divisions.—Table 4 shows the population of each judicial division by recording districts, cities, towns, villages, and other places. Following the precedent of previous censuses of Alaska, a large number of unincorporated places have been returned separately, and have been designated as "villages." In addition, other places of settlement with 10 or more

inhabitants have been returned separately under the local names of the areas. The villages and other places, together with the incorporated cities and towns, are shown under the recording districts in which each respective place is located. Those unincorporated villages and other places for which population is given only for 1939 were not reported as separate places in 1929 and 1920.

TABLE 4.—POPULATION OF JUDICIAL DIVISIONS BY MINOR GEOGRAPHIC DIVISIONS: 1920 TO 1939

The districts shown in this table are recording districts. For changes in boundaries, etc., between 1929 and 1939, see footnotes; for those between 1920 and 1929, see Reports of the Fifteenth Census (1930), vol. I, pp. 1221-1223. # CHARACTERISTICS OF THE POPULATION

## INTRODUCTION

**General.**—This second Population bulletin for the Territory of Alaska presents data on the basic characteristics of the population, including sex, age, race, nativity, citizenship, marital status, relationship to head of household, school attendance, years of school completed, place of birth, employment status, occupation, and industry. In addition, it contains housing subjects that are available on the Population schedule, such as tenure of home, value or monthly rent of home, and number of rooms. In the first Population bulletin, entitled "Number of Inhabitants," the total population of the Territory on October 1, 1939, was given for all political subdivisions, including judicial divisions, recording districts, cities, towns, and villages.

**Arrangement of tables.**—The tables in the present bulletin are arranged on the basis of the areas for which figures are presented. Tables 1 to 13 present statistics for the Territory as a whole, tables 14 to 16 for the four judicial divisions (which for census purposes are treated as equivalent to county areas),

table 17 for the recording districts, and tables 18 and 19 for the eight incorporated places of 1,000 or more. Table 20 contains the housing data for the Territory, judicial divisions, and incorporated places of 1,000 or more. The amount of detail presented in this bulletin is generally greater for the larger areas than for the smaller ones.

**Availability of unpublished data.**—The statistics given in this bulletin for the Territory and for recording districts represent practically all of the data tabulated for these areas in the 1939 tabulation program. Similar statistics have been tabulated for judicial divisions and for incorporated places of 900 or more. These statistics can be made available, upon request, for the cost of transcribing or reproducing them. Requests for such unpublished data, addressed to the Director of the Census, Washington, D. C., will receive a prompt reply, which will include an estimate of the cost of preparing the data.

## DEFINITIONS OF TERMS AND EXPLANATIONS

### POPULATION

**Sex and race.**—Practically all of the data in this bulletin are presented separately for males and females. Moreover, as far as feasible, the data are also presented by race. Three major race classifications are distinguished in the tabulations, namely, white, native stock, and "other races." It should be noted that the term "native" in the phrase "native stock" is used in this context to indicate races indigenous to the region but is not necessarily limited to persons born in continental United States or its territories or possessions. For several characteristics, the "native stock" class is further subdivided into Aleuts, Eskimos, and Indians. In some tables, however, the categories "native stock" and "other races" have been combined as "non-white." Statistics for all races, including a detailed classification of the nonwhite races, are presented in table A.

TABLE A.—POPULATION BY NATIVITY AND SEX, FOR THE TERRITORY: 1939

RACE	ALL CLASSES			NATIVE		FOREIGN BORN	
	Total	Male	Female	Male	Female	Male	Female
All races	72,524	43,003	29,521	55,849	27,543	7,154	1,976

Aleut	5,509	2,968	2,541	2,966	2,631	2	—
Eskimo	15,576	8,034	7,542	8,016	7,525	18	17
Indian	11,283	5,788	5,495	5,709	5,401	70	94

Hawaiian	22	15	7	15	7	—	—
Korean	6	5	1	2	1	3	—
All other	5	4	1	3	1	1	—

**Nativity.**—In the classification by nativity, a person born in continental United States or in any of its territories or possessions is counted as native. Likewise included as native are the small number of persons who, although born in a foreign country or at sea, were American citizens by birth because their parents were American citizens.

The classification of the population by nativity is shown for all areas for the white population. The nativity distribution of the

nonwhite races and of the population as a whole is given only for the Territory. Persons of native stock, who constitute 97.3 percent of the nonwhite population of the Territory, are practically all native. The foreign-born white are also presented by country of birth as described below.

**Age.**—The age classification is based on the age of the person at his last birthday before the date of the census, that is, the age of the person in completed years.

**Linguistic stock.**—The Indian population of the Territory is classified in detail by age according to linguistic stock. Although, for convenience, Aleuts and Eskimos are treated as separate races, they are in reality branches of a common linguistic stock, the Eskimaian.

**Citizenship.**—The classification of the foreign born by citizenship comprises two main groups, naturalized and alien; the second group is further subdivided into those having first papers (that is, those who have made formal declaration of intention to become citizens of the United States) and those having no papers. In addition, there is a third group made up of foreign-born persons for whom no report on citizenship was obtained. Since it is likely that most of these persons are aliens, they are often included with the aliens in summary figures for citizens and noncitizens. The potential voting population is also shown, representing the total of the naturalized foreign-born population 21 years old and over and the native population 21 years old and over.

**Marital status.**—In the classification by marital status four major groups are shown: Single, married, widowed, and divorced. In both 1929 and 1939 the enumerators failed to report marital status for a small number of persons. All these persons were classified as single.

Because at each age, distributions of marital status for males and females are quite different, no data are shown for both sexes combined. Since the proportion of single males or females in a given area depends largely upon the prevailing age at marriage and the age composition of the population, it is desirable to cross-classify the statistics on marital status in detail by age. Similarly the proportions of widows and widowers can be compared informatively only if the relative age compositions are

taken into account. Hence, all the data on marital status are presented by 5-year age periods.

**Relationship to head of household.**—The 1939 census was the first from which a tabulation was made of the relationship of each person to the head of his household. Figures are presented in table 14 for persons returned in each of the categories: Head of a household; wife, child, or other relative of head; nonrelative of head; and persons not in private households.

**School attendance.**—The school attendance statistics for 1939 are based on the replies to the enumerator's inquiry as to whether the person had attended, or been enrolled in, any regular school or college between September 1 and October 1, 1939. Attendance at night schools or vocational schools was included, but correspondence school work was not included.

**Highest grade of school completed.**—In 1939 the census included, for the first time, a question on the formal educational attainment of each person. The question on the schedule asked for the last full grade that the person had completed in the regular school system—public, private, or parochial school, college, or university. This question replaced the inquiry on illiteracy included in previous censuses and provides data on educational status, a characteristic which is significant for every population group.

**Foreign-born white population by country of birth.**—The foreign-born white population in the Territory is classified according to country of birth. No figures are given here for the country of birth of foreign-born nonwhites, since there were less than 350 such persons.

**Employment status.**—The classification by employment status in the 1939 Census of Population refers to the activity during the week of September 24 to 30, 1939, of all persons 14 years old and over. Two principal groups are distinguished: (a) Persons in the labor force, including those at work, those with a job but temporarily absent from work, those on public emergency work, and those seeking work, and (b) persons not in the labor force. The latter group includes persons engaged in own home housework; those in school; those unable to work; all inmates of penal and mental institutions and homes for the aged, infirm, and needy, regardless of their activity during the census week; others not at work and not having a job, not on public emergency work, and not seeking work; and persons for whom employment status was not reported.

The categories of persons in the labor force are defined more precisely below:

**Employed (except on public emergency work).** The group classified as employed includes (a) persons who worked for pay or profit at any time during the week of September 24 to 30, 1939, in private work or nonemergency Federal, Territorial, or local government work, or assisted without pay on a family farm or in a family business; and (b) those not actually at work and not seeking work during the week of September 24 to 30, 1939, but with jobs, businesses, or professional enterprises from which they were temporarily absent because of vacation, illness, industrial dispute, or lay-off not exceeding 4 weeks with definite instructions to return to work on a specific date. The group "Employed (except on public emergency work)" includes not only employees but also proprietors, farmers, and fishermen working on their own account, other self-employed persons, and unpaid family workers.

**On public emergency work.** This category includes persons who, during the week of September 24 to 30, 1939, were at work on or assigned to, public emergency work projects conducted by the Work Projects Administration (WPA) or the Civilian Conservation Corps (CCC).

**Seeking work.** This category represents persons without work of any sort in the week of September 24 to 30, 1939, who were actively seeking work during that week. The group seeking work was subdivided into experienced workers and new workers, the latter being persons who had not previously worked full time for 1 month or more. Persons seeking work, for whom a report on work experience was lacking, were classified as experienced workers.

**Comparison of 1940 data on the labor force with previous data for gainful workers.**—The 1939 data on the labor force are not directly comparable with the census statistics for gainful workers in 1929 because of differences in definition. "Gainful workers" were persons reported as having a gainful occupation, that is, an occupation in which they earned money or a money equivalent, or in which they assisted in the production of marketable goods, regardless of whether they were working or seeking work at the time of the census. The labor force is defined in the 1939 census on the basis of activity during the week of September 24 to 30, 1939, and includes only persons who were at work, with a job, seeking work, or on public emergency work in that week. Thus many seasonal workers in the fishing and canning industries and in other seasonal pursuits, who were neither working nor seeking work during the census week, were excluded from the labor force in 1939; such persons were for the most part classified as gainful workers in 1929. In addition, certain other classes of persons, such as retired workers, some inmates of institutions, and recently incapacitated workers, were frequently included among gainful workers in 1929, but in general, such persons are not in the 1939 labor force. On the other hand, the 1939 labor force includes persons seeking work without previous work experience, that is, new workers, and persons reported as in the labor force for whom neither occupation nor industry was entered on the schedule. Most of the new workers at the time of the 1929 census were probably not counted as gainful workers. Likewise, some persons who were actually gainful workers, but for whom neither occupation nor industry was reported, were not included in the gainful worker figures for 1929.

The 1939 labor force figures are restricted to persons 14 years old and over, whereas the number of gainful workers shown in the 1929 census report included persons 10 years old and over. The number of workers 10 to 13 years old has become relatively small and no longer justifies the additional burden of enumeration and tabulation necessary to retain the 10-year age limit. In making comparisons between the 1939 labor force data and the gainful worker statistics in the earlier census reports, the slight difference in age limits should be taken into consideration.

**Occupation statistics.**—Occupation statistics are presented in this bulletin in terms of 12 major occupation groups for employed persons (except persons on public emergency work). Statistics are given for the Territory, for the four Judicial Divisions, and for each incorporated place of 1,000 or more.

The major occupation groups presented here are groupings of the 451 specific occupation titles in the 1940 classification system used by the Bureau of the Census.<sup>1</sup> The specific occupations in each of the 12 major groups are listed on page 3.

**Industry statistics.**—Industry statistics for persons employed (except on public emergency work) are presented in this bulletin for the Territory, the Judicial Divisions, and for each incorporated place of 1,000 or more. These statistics are in terms of a condensed list of 35 industry groups, which represent selections and combinations of titles in the 1940 industry classification of 132 titles used by the Bureau of the Census.<sup>2</sup> The 35 industries selected for the condensed list presented here are those in which significant numbers of persons are employed in Alaska.

<sup>1</sup> The detailed 451-item classification is convertible, with very few exceptions, to the 327-item Convertibility List of Occupations, which was prepared by the Joint Committee on Occupation Classification (sponsored by the Central Statistical Board and the American Statistical Association) to increase comparability among occupation statistics from various governmental and private sources. The major occupation groups used here and the major groups of the Convertibility List of Occupations differ somewhat, but are convertible to each other.

<sup>2</sup> The 132-item list, designed for classifying industry reports from individuals, was prepared by the Joint Committee on Occupational Classifications, in cooperation with the Committee on Industrial Classification, composed of representatives of various governmental agencies.

## HOUSING

**Dwelling unit.**—The term "dwelling unit" as used in this bulletin is defined as the living quarters occupied by one private household. A dwelling unit may be a detached house, an apartment in a larger building, or a room in a structure primarily devoted to business or other nonresidential purposes. It may even be a boat or tent, if this is occupied by persons having no other place of residence.

**Tenure.**—Dwelling units are classified by tenure as owner-occupied and tenant-occupied. A dwelling unit is classified as owner-occupied if it was owned either wholly or in part by the head of the household or by some related member of his family living in the dwelling unit. All other occupied units are classified as tenant-occupied whether or not cash rent was actually paid for the living quarters. Rent-free quarters and living accommo-

dations which were received in payment for services performed are thus included with the tenant-occupied units.

**Value and monthly rent.**—The enumerator was instructed to obtain for each owner-occupied dwelling unit the estimated current market value of the home; for each tenant-occupied dwelling unit the monthly contract rent, or, if no cash rent was paid, the estimated monthly rental value based on rents for similar dwelling units in the neighborhood.

**Number of rooms.**—All rooms that are used, or are available for use, as living quarters for the household are counted in determining the number of rooms in the dwelling units. Bathrooms, closets, pantries, halls, or screened porches are not counted as rooms.
