Demographic Data: Concepts, Trends for Alaska, and Resources

Eddie Hunsinger

Alaska Department of Labor
and Workforce Development

Concepts: Demographic Accounting and Aging

The Balancing Equation

The most basic method of calculating numerical population change over time is the “balancing equation,” shown below.

$$P_1 + (B - D) + (I - E) = P_2$$

Where P_2 is the population at the later date and P_1 is the population at the earlier date; B is births and D is deaths between the two dates; and I is immigration (or in-migration) and E is emigration (or out-migration) between the two dates.

Jan. 2009					Jan. 2010
population	+	(2009 Births-Deaths)	+	(2009 Immigration-Emigration)	= population of Sweden
9,256,000	+	(111,800 – 90,080)	+	(102,280 – 39,000)	= 9,341,000

During 2009, the population of Sweden increased by 85,000.

(Population Reference Bureau)

0 → 50 → 100

Class Discussion: The 1920 Decennial Census Cartoon

Featured Activity

How Many Single Father Households are in the United States?

Students examine the changes in population density in the U.S. during these historic decades.

In this activity, students examine a cartoon that led to the 1920 Census in order to better understand the challenges of the time.

While completing this activity, students will learn the number of single father households in the United States.

ABOUT INED LATEST NEWS RESEARCH RESOURCES, METHODS PUBLICATIONS ALL ABOUT POPULATION

All about population

All about population

All about population

A world population of 7 billion in 2011... and how many tomorrow?

For thousands of years, human beings were a rare species and their numbers grew very slowly. By around 1800, the population began to increase rapidly, starting in the rich countries and then, from the twentieth century, in the rest of the world.

What are the reasons for this growth, and what factors are affecting the population today? Will the world population level off in the years to come? How will the world be populated in the future?

These pages include animations, documents and fact sheets to help you find the answers to these questions, and learn more about the world population. Discover the science of demography, find facts and figures about a country or group of countries, imagine the population of tomorrow by looking into the future.

2014 Alaska Economic Trends

Alaska Economic Trends are searchable from 1978 to the present using the **Trends search page**. The search can include any combination of the title or subtitle, date or date range, author, or full text.

May 2014
The Copper River Basin
Surrounded by mountain ranges on all sides, the Copper River Basin, located in what was once the bottom of a massive ice-age glacial lake, carves out its own identity among Alaska regions.
One of Alaska's major waterways, the Copper River descends from the Wrangell Mountains and heads north before taking a counterclockwise turn through the basin, the Chugach Mountains, and finally empties into the Gulf of Alaska.
May 2014 Trends

April 2014
Alaska's Housing Market
Living in Alaska presents many opportunities and challenges, and finding a home is often one of them.
In the coming months, Trends will feature regional housing profiles that detail some of these costs, as Alaska is so large and diverse that its local markets can differ widely. Despite those local differences, it's helpful to first examine the state housing market as a whole to see how it differs from the rest of the nation.
April 2014 Trends

March 2014
Retail Sales Workers, 10 Years Later
More than 20,000 retail salespeople worked in Alaska in 2002, and for more than 15,000 of them, retail was their main job.
Ten years later, most of this group still lived in the state and about 17 percent of those who could be located had made retail sales a continuing career. The others had moved on to more than 500 other occupations, from accounting clerks and roustabouts to registered nurses and attorneys.

Search Alaska Economic Trends articles from 1978 to Present

[View this year's issues of Alaska Economic Trends.](#)

Search Trends by title/subtitle, author, date range or text within an article

You can search Trends archives using all four criteria: title/subtitle, date range, author, full text, or any combination. If you're using full text search, we recommend reading the explanation below.

Search title/subtitle:

Use spaces between words when searching. The search will return articles whose titles or subtitles contain **ALL** the terms you used.

Date range: Oldest Year year Month month TO Newest Year year Month month

Enter at least the oldest year when searching. All other fields can be left blank. If you're entering a range of years (such as 2000 to 2009), you are not required to choose a month.

Author: Choose author

Authors are in alphabetical order by last name.

Full text search:

The text search is powered by the SOLR platform, and will return articles with any of the words you use unless you include the "AND" operator or place all the words within quotes. Read more about SOLR below.

[Search Trends Archives >>](#)

How to use the SOLR text search within an article

SOLR search criteria consist of terms and operators that search text within articles. However, search results can vary because SOLR uses "stemming" to find articles that meet your criteria. Stemming, a computerized algorithm, is used in many search engines to reduce words to their stem or root prior to the search. For example, if your search criterion is "earnings," the algorithm will reduce the search to "earn" and find any article containing the words earn.

Migration Data and Information

Migration data for Alaska come from three main sources, each with its own strengths and weaknesses. This means that each source is an indicator of migration, but none provides a complete system to directly track it.

To view the official estimates of annual net migration for Alaska and its regions, boroughs, and census areas, go to our [Population Estimates page](#) and see "Components of Change."

Alaska Economic Trends Articles About Migration

- [March 2013](#): Home-Grown Workers, Comparing those who lived here as kids to those who didn't
- [April 2012](#): Alaska's Highly Migratory Population, Annual Moves to, from, and across the state
- [February 2010](#): Anchorage Migration, The movement between Alaska's major Native areas and Anchorage
- [June 2009](#): The U.S. Economy and Alaska Migration, A historical connection between the two
- [July 2004](#): Migration, Alaska is a state of migrants; only 38.1 percent were born here

PFD-Based Migration Indicator Data

Permanent Fund Dividend (PFD) based migration data have broad in-state coverage but lag on new migrants from outside the state, because they aren't eligible for the PFD until they've lived in Alaska for one calendar year. Similarly, PFD data do not capture people who don't live here long enough to qualify for a PFD. Maps of these data are available on our [Maps & GIS](#) page.

- [PFD-Based Migration between Boroughs/Census Areas, 2000-2013 \(Excel\)](#)
- [PFD-Based Migration between Boroughs/Census Areas, 2000-2013 \(Interactive\)](#)

IRS-Based Migration Indicator Data

Internal Revenue Service (IRS) based migration data provide direct counts of moves between U.S. counties, boroughs, and census areas by comparing the addresses of exemptions — that is, filers and their dependents — from year to year. However, they only cover about 85 percent of Alaska's population, with particularly low coverage in low income areas, and values below 10 are suppressed.
