## APPENDIX 32

# INTRODUCTION

This report, produced as required by AS 36.10.130, details nonresident employment in the state. It also helps the state meet its constitutional obligation to use, develop, and conserve its natural resources “for the maximum benefit of its people.”

This report has two main findings:

- A large percentage of Alaska’s nonresident workforce is employed in the state’s most seasonal industries, with seafood processing at the top of that list.
- High-paying, year-round jobs with high percentages of nonresidents are most heavily concentrated in the oil and gas industry, where remote work sites are a major factor.

## How Alaska residency is defined

A person is considered a resident for this report if he or she applied for a Permanent Fund Dividend in either of the two most recent years: 2018 or 2019. Because a person must live in the state for a full calendar year to become eligible for a PFD, those who move to Alaska and consider it their new principal residence will be initially identified as nonresidents. The appendix provides more detail.

To calculate residency, the Department of Labor and Workforce Development matches quarterly Alaska unemployment insurance records (which contain industry, occupation, wages, and place of work information) for each worker with Alaska Permanent Fund Dividend applications. Wage records are not available for federal employees, the military, or the self-employed, so those workers are not part of this report.

## Workers by quarters worked

## Where nonresidents work

Of the 322,309 workers identified as residents in this report, 287,101 (or 89.1 percent) appeared in both the 2018 and 2019 PFD applicant files.

Of the remaining 35,208 resident workers, 16,467 appeared in only the 2018 file, suggesting they lived in Alaska for all of 2018 (the qualifying period), but likely left the state in 2019.

Another 18,741 workers appeared in only the 2019 PFD file. These workers likely moved to Alaska in 2018 but weren’t here for the entire calendar year so weren’t eligible for a 2019 PFD.

## Data limitations

One of the obvious limitations of using PFD applications to determine residency is the lag due to the strict requirement that a person live in Alaska a full calendar year to become eligible. Knowing that a certain percentage initially identified as nonresidents will become residents is key to understanding this report.

All industries hire people who are new to the state and at least occasionally hire people from outside the state. That has different policy implications than industries that hire seasonal nonresidents or workers who keep their principal residence outside of Alaska.

An analysis of 2017 worker information showed that about 12 percent of the nonresidents ultimately applied for a PFD and were considered residents for this report. The likelihood that someone new to Alaska will stay and become eligible for a PFD varies significantly by industry.

For example, nonresident oil and seafood processing workers are much less likely to become residents than state and local government workers and health care workers. This again highlights the difference between workers who would be considered new residents by other measures and those who are nonresidents by any measure.

Alaska has especially large in and out migration flows — 40,000 to 50,000 people move to Alaska and another 40,000 to 50,000 leave each year — and a certain number of workers would also live here and be considered residents by other measures but not stay long enough for PFD eligibility.

## Other measures of residency

Despite these limitations, PFD data provide the most comprehensive, reliable, and consistent way to measure residency. Other options such as voter registration, motor vehicle registration, driver's licenses, or fishing and hunting licenses capture a much smaller fraction of the Alaska workforce. The monetary incentive the PFD provides and the strict penalties for providing false information make it the clear choice for this report.

## Workers by quarter and residency

# OVERALL RESIDENCY

Nonresidents have represented a significant portion of Alaska's total workforce since we began collecting these statistics. Although the overall nonresident percentage doesn't change significantly from year to year, it can vary widely by industry, area, or occupation.

Regardless of these variations, when resident and nonresident worker counts both rise, it's a sign of broad economic growth. Conversely, when both counts fall, it signals economic weakness.

In 2018, the percentage of nonresident workers fell two-tenths of a percentage point, to 20.7 percent. The total number of workers fell, with nonresident workers down 1 percent and resident workers up less than 1 percent. The overall decline in workers that began in 2016 as a result of the recession appeared to subside in 2018.

## Workers and nonresidency, overall

## Wages and nonresidency, overall

# RESIDENCY BY INDUSTRY

# INDUSTRY OVERVIEW

Nonresident percentages vary significantly by industry. The manufacturing industry, which is mostly seafood processing, is the largest employer of nonresidents, employing nearly one in five (21 percent) of all nonresident workers in 2018. Nonresident numbers were also high in the leisure and hospitality and trade, transportation, and utilities industries. The nonresident workforce for these three industries combined represented more than half of all nonresident workers in 2018.

Other industries with high percentages of nonresidents included oil and gas, construction, metal mining, and other visitor-related industries. These have at least one of the following: high seasonality, a need for specialized skills, or remote work sites.

Note that the following sections refer to private-sector occupations only, except where government is specified.

## Workers and wages for major and select industry categories

	Total workers	Total wages (in millions)	Nonresident workers	Percent nonresident	Nonresident wages (mil)	Nonresident wages, pct
Agriculture, Forestry, Fishing, Hunting	2,645	\$62.1	1,157	43.7	\$24.9	40.1

Total	406,547	\$16,639.5	84,238	20.7	\$2,494.1	15.0

\*This industry category includes support activities for oil and gas drilling and related operations, NAICS 213111 and 213112.

# OIL AND GAS

The oil and gas industry employs 3 percent of Alaska workers but has an outsized effect on the economy. Oil and gas wages are 2.6 times higher than the state-wide average. The percentage of nonresident workers in the oil and gas industry has also historically been higher than the statewide average.

The oil industry is made up of oil and gas extraction and oilfield services. Extraction includes firms that primarily operate and develop oil and gas fields, most of which are in remote sites on the North Slope.

The industry was among the hardest hit by the most recent recession, and its worker counts began falling in 2016. Losses continued in 2018, but at a slower pace than the prior two years.

Welders, Cutters, Solderers, and Brazers	158	33.5
Helpers: Construction Trades, All Other	143	39.9

# CONSTRUCTION

Wages in construction are higher than the state average, although not as high as oil and gas.

Within the construction industry, specialty trade contractors accounted for most of the workers and wages.

The number of construction workers rose in 2018 from the prior year, buoyed by a combination of federal projects and earthquake damage repair. Resident and nonresident worker counts both increased.

Heating, Air Conditioning, and Refrigeration Mechanics and Installers	231	10.4

# METAL MINING

Metal mining is of both historical and contemporary importance to Alaska's economy. The extraction of gold, silver, copper, lead, and rare earth elements employed 3,571 people in 2018 and contributed \$319 million in wages.

Total worker counts were up from the previous year, with resident and nonresident numbers both rising.

## At a glance

Helpers: Extraction Workers	46	54.3

# SEAFOOD PROCESSING

Fishing is a critical component of Alaska's economy, but because fish harvesters are self-employed and exempt from reporting employment and wages to the state, most harvesters and crew aren't part of this report. Seafood processors, on the other hand, are included in wage record data and can be described here.

The seafood processing industry has had the highest number and percentage of nonresident workers every year since data collection began.

Although self-employed fish harvesters aren't part of the worker totals or the total nonresident hire rate, the department estimates their numbers each year from other data sources. In 2018, nonresidents were an estimated 44.0 percent of the harvesting workforce, which includes permit holders and their crew. Nonresidents took in 67.1 percent of gross wages.

ND means not disclosable. Private sector only.

# VISITOR-RELATED INDUSTRIES

Although visitor expenditures play a major part in several Alaska sectors, the data can't isolate a single "visitor industry." However, several industries can be considered visitor-related: accommodation, air transportation, scenic and sightseeing transportation, and food service and drinking establishments. Percentages of nonresidents and wages can vary widely within each of these industries.

## Residency in visitor-related industries

# HEALTH CARE

The health care industry remained one of Alaska's largest in 2018, and it has grown considerably over the last decade. Unlike many rapidly expanding industries, health care hasn't significantly increased its nonresident hire rate.

Health care was one of the few major industries in Alaska to grow in 2018, with employment rising 2.2 percent to 42,967 total workers.

Despite a 32 percent increase in the number of health care workers in Alaska over the last 10 years, the nonresident percentage has remained significantly lower than that of all industries combined.

## At a glance

<b>Percent nonresident</b>	<b>11.7%</b>

# RESIDENCY BY OCCUPATION

# OCCUPATION OVERVIEW

Large numbers of nonresidents work in a variety of occupations. The largest numbers were among seafood processing workers, retail salespeople, waiters and waitresses, and cashiers.

Some occupations with large numbers of nonresidents are relatively high-paying, and while they may require significant training or education, this suggests an opportunity for unemployed Alaskans with the necessary credentials.

The table below lists high-paying occupations with the largest numbers of nonresidents. Some of the highest-paying include engineers, airline pilots, production workers, and construction managers.

The next two tables, starting on the next page, list occupations with the most and highest shares of nonresidents, regardless of wages. The occupations with the largest numbers of nonresidents were associated with seafood processing and retail sales.

## Top jobs where nonresidents make more than the median wage\*

	Total workers	Nonresidents	Percent nonresident	Avg wages per quarter
Airline Pilots, Copilots, and Flight Engineers	2,395	1,344	56.1	\$39,746

RESIDENCY

**BY AREA**

# GEOGRAPHIC DISTRIBUTION

Nonresidents work in every borough and census area. In remote areas and highly seasonal industries, workers from outside Alaska can outnumber residents — this is particularly true in Southwest, where seafood processing draws a large seasonal workforce.

Alaska residents who commute to different parts of the state can also make up a significant portion of a region's workforce.

To determine whether a resident lives and works in the same borough or census area, we match employment records that show place of work with Permanent Fund Dividend applicant addresses. Overall, 66.9 percent lived and worked in the same area in 2018, and 12.4 percent of resident workers lived somewhere else in Alaska.

## Worker residency by area

	Local residents	Nonlocal residents	Nonresidents	Total workers	Percent local

Local Alaska residents are those who live in the reported borough or census area as determined by the ZIP code of the most recent Permanent Fund Dividend mailing address. We match working employment records showing place of work with PFD applicant addresses to determine the numbers of locals, nonlocal Alaskans, and nonresidents working in each area. We based the place of work on that reported by the employer. We assigned workers a geographic area based on the place where they earned the most money in 2018. If employers did not provide specifics, we used the primary business location to determine the place of work.

ND means not disclosable. Private sector only.

# ANCHORAGE

Anchorage is Alaska's most populous city. It had 158,639 workers in 2018, or 39 percent of all Alaska workers.

Because of its size, Anchorage has a diverse economy with no dominant industry. Service industries such as health care and social assistance, retail trade, and accommodation and food services are among the city's largest. Anchorage also hosts the headquarters of firms that do business elsewhere, has a large city government and school district, and is a major air transportation hub. The Port of Anchorage, Ted Stevens Anchorage International Airport, the Alaska Railroad, and the highway system all make the city Alaska's primary distributor of goods.

Anchorage is also home to Alaska's largest military base, Joint Base Elmendorf-Richardson, which creates civilian jobs as well as active duty military jobs.

Almost twice as many nonresidents work in An-

chorage as in any other area, but nonresidents were only 12 percent of the Anchorage workforce in 2018. The 19,479 nonresidents who worked in Anchorage were heavily concentrated in the accommodation and food services and the health care and social assistance industries, which were 18.7 percent and 9.6 percent nonresident, respectively.

Seventy-six percent of Anchorage workers were local residents and 11.4 percent were residents of other places in Alaska — mainly the Matanuska-Susitna Borough, Anchorage's northern neighbor. For most Mat-Su residents, Anchorage is about an hour-and-a-half commute round-trip. Cheaper housing in Mat-Su and higher average wages in Anchorage make it worth the drive for some.

Nonlocal Alaskans working in Anchorage were concentrated in the health care and social assistance industry, which was 9.7 percent nonlocal, and in construction, which was 24.0 percent nonlocal.

# MATANUSKA-SUSITNA

The Matanuska-Susitna Borough is Alaska's fastest-growing and second most populated area, having overtaken Fairbanks in recent years. Although most of the Mat-Su population lives in the greater Palmer-Wasilla area, smaller communities dot the Parks and Glenn highways.

In some ways, Mat-Su is a suburb of Anchorage, and many Mat-Su residents work and shop there. Still, retail trade is Mat-Su's biggest industry, spurred by the recent construction of several new big box stores in the borough.

In 2018, 31,112 people worked in the Mat-Su Borough and just 11.6 percent were nonresidents. The borough doesn't have as much employment in the industries that employ high percentages of nonresidents, such as seafood processing and tourism.

The health care and social assistance industry and retail trade were the largest employers of local Mat-Su workers, at 18.7 percent and 15.6 percent, respectively.

The largest industry for nonresidents in Mat-Su was accommodation and food services, where 20.1 percent of its 3,544 workers were nonresidents. Retail trade had the second-highest number at 485 followed by construction with 421. Although these industries have the largest numbers of nonresidents, the majority of their workers live in Mat-Su.

While 78.8 percent those working in Mat-Su were locals in 2018, many Mat-Su residents worked elsewhere. Estimates of commuter patterns suggest nearly a third worked in Anchorage and nearly 7 percent worked in the North Slope Borough.

## Mat-Su worker residency and wages by industry

	Total workers	Total wages	Workers			Wages

# FAIRBANKS

The Fairbanks North Star Borough is the third most populated area in the state. Fairbanks is at the heart of Alaska's interior and is the northern terminus of the Parks and Richardson highways and the southern terminus of the Dalton Highway to the North Slope.

In addition to serving as the Interior's Region's transportation hub, Fairbanks is its economic, medical, educational, and cultural center. The University of Alaska Fairbanks is the borough's largest employer. Eielson Air Force Base and Fort Wainwright also generate civilian jobs in the borough.

Fairbanks had 46,562 workers in 2018, or 11.5 percent of the state's workforce. Those who live

and work in Fairbanks made up a majority, at 72.9 percent. Fairbanks workers who lived elsewhere in the state made up 10.5 percent. The remaining 16.7 percent were nonresidents (7,765).

Fairbanks is another mostly urban center with workers spanning all industries. Nonresidents were concentrated in accommodation and food services, retail trade, health care, and construction, with the largest share in accommodation and food services.

Fairbanks is home to Fort Knox Gold Mine, a major mining employer. Nonresidents made up 21.4 percent of all mining workers in Fairbanks in 2018. Nonlocal Alaskans made up another 5.2 percent, making locals the remaining 73.4 percent.

# RURAL INTERIOR REGION

The Rural Interior Region is the largest geographically but the least populous in Alaska. This doughnut-shaped region includes the vast Yukon-Koyukuk Census Area, the Denali Borough, and the Southeast Fairbanks Census Area (but it excludes the Fairbanks North Star Borough). The region is so large and diverse that it can't be characterized as a single economy, but a few key industries keep parts of the region flourishing.

The region had 11,176 workers in 2018, of whom 43.2 percent were local residents. The nonresident share was 36.2 percent, which was the second highest of all eight regions. A majority of the region's nonresidents work in the Denali Borough.

Accommodation and food services is the region's largest industry, followed by local government, which is one of the few to offer year-round employment across the entire area. Even the smallest communities along the Yukon River or on the tundra have a school or local government. Of the area's 2,754 local government workers in 2018, 76.8

percent were local residents.

The major employers of nonresidents in the region were the accommodation and food services industry and mining, which are concentrated in Denali National Park, at Usibelli Coal Mine in the Denali Borough, and at the Pogo Gold Mine in the Southeast Fairbanks Census Area.

In 2018, 74.8 percent of the region's accommodation and food services workers were nonresidents and another 12.1 percent were nonlocal Alaskans. Nearly all of these tourism-related jobs are seasonal, and locals and nonlocals both earn more than nonresidents.

Mining employed 903 workers in the Rural Interior in 2018, 16.5 percent of whom were locals. The largest share were nonresidents — 53.4 percent — with the remainder being nonlocal Alaskans.

Many other industries in the region had high percentages of nonresidents, which is typical for highly seasonal or remote work.

## Rural Interior worker residency and wages by industry

	Total workers	Total wages	Workers			Wages

# NORTHERN REGION

Alaska's Northern Region includes the North Slope and Northwest Arctic boroughs and the Nome Census Area. Most communities in the Northern Region are on the Arctic coast and are home to primarily Inupiat populations.

The Northern Region has two economies. One is village-based, with local government and service jobs augmented by subsistence, and the other is industrialized resource extraction at North Slope oil fields and the Red Dog Mine.

In 2018, 26.1 percent of the Northern Region's 27,433 workers were nonresidents, and another 34.5 percent were nonlocal Alaskans. The Northern Region has the state's lowest percentage of local workers.

The mining industry, which includes workers at Red Dog Mine in the Northwest Arctic Borough as well as North Slope oil workers, is the region's largest at 7,905 workers in 2018. Just 3.4 percent of workers in the Northern Region mining industry were locals, and 55.8 percent were nonlocal Alaskans. Nonresidents made up 40.9 percent.

Local government, which includes schools, is the region's second-largest industry at 6,605 workers in 2018, 81.8 percent of whom were local.

Construction is another major industry, serving communities and the extractive industries. Of the 2,249 construction workers in the Northern Region in 2018, 17.2 percent were local and 54.1 percent were nonlocal Alaska residents.

## Northern Region worker residency and wages by industry

# SOUTHWEST REGION

The Southwest Region includes the Kusilvak, Bethel, Dillingham, and Aleutians West census areas and the Bristol Bay, Lake and Peninsula, and Aleutians East boroughs. Fishing and fish processing are the region's dominant industries, but because of data limitations, this report can't capture most fish harvesters.

The Southwest Region had 33,041 total workers in 2018, excluding fish harvesters, with manufacturing as its largest employer. Manufacturing accounted for a third of wage and salary workers (mainly seafood processing).

Seafood processing has historically employed a high percentage of nonresidents because the work is seasonal, remote, and relatively low-paying. In most communities with seafood processing plants, the local workforce can't satisfy the peak demand for labor.

Of all manufacturing workers in Southwest, 78.1 percent were nonresidents. Locals made up 14.7 percent, and they earned more on average than nonlocals and nonresidents. Local workers tend to

hold higher-paying jobs and work more months of the year.

Southwest's seafood processing industry employs a significant portion of Alaska's total nonresident workforce. Nonresidents in Southwest manufacturing represented 44.2 percent of all nonresidents working in that industry in 2018 and 15.1 percent of all nonresident workers in Alaska.

As is typically the case with rural areas, local government is a large employer in Southwest. The industry employed 8,414 workers, 84.6 percent of whom were locals. Other large industries in Southwest with a workforce that's mostly locals include health care and social services, and retail.

Not all of Southwest is tied to the commercial fishing industry. The Lake and Peninsula Borough and the Bethel and Kusilvak census areas have much smaller numbers of seafood processors. Kusilvak had the highest percentage of local workers in 2018, at 83.4 percent. The Bristol Bay Borough had the lowest at 7.7 percent.

## Southwest Region worker residency and wages by industry

# GULF COAST REGION

The economically and geographically diverse Gulf Coast Region includes the Kodiak Island and Kenai Peninsula boroughs and the Valdez-Cordova Census Area.

Much of the Kenai Peninsula is a few hours' drive from Anchorage and shares many of the same urban characteristics. Tourism plays a significant role on the peninsula, and sport and commercial fishing are economic drivers. The borough also has considerable oil and gas extraction.

The Kodiak Island Borough is home to part of Alaska's fishing fleet as well as one of the largest Coast Guard bases in the U.S.

The Valdez-Cordova Census Area includes the coastal communities of Valdez and Cordova as well as inland communities in the Copper River basin.

The Gulf Coast Region had 42,317 workers in 2018, most of them in the Kenai Peninsula Borough. Man-

ufacturing — mostly seafood processing but including oil refining — accounted for the largest share of total workers. Local residents were 38.8 percent of manufacturing workers and nonresidents made up 55.4 percent.

Local government was another large employer in the Gulf Coast with 6,004 workers, 89.3 percent of whom were local.

Visitor-related industries have high percentages of nonresidents in the Gulf Coast. The agriculture, forestry, fishing, and hunting industry had a nonresident percentage of 44.4; the arts, entertainment, and recreation industry was 48.6 percent; and the accommodation and food services industry was 35.9 percent.

Of the workers in the region's mining industry, which includes mostly Cook Inlet oil and gas extraction, 74.5 percent were locals.

## Gulf Coast Region worker residency and wages by industry

# SOUTHEAST REGION

The Southeast Region is home to 10 boroughs and census areas, the largest of which is the City and Borough of Juneau, the state's capital.

Of the 47,533 workers in Southeast in 2018, 27.1 percent were nonresidents and 7.3 percent were nonlocal Alaskans.

Local government had the most workers in Southeast at 7,505, 85.2 percent of whom were local.

Retail trade had the second highest number of workers, most of whom were local.

State government is the third-largest industry. The

industry had one of the highest percentages of locals and one of the lowest percentages of nonresidents.

Other large industries in the region include those related to seasonal tourism and seafood processing. Accommodation and food services had 4,715 total workers, 54.7 percent of whom were local. Manufacturing, which is mainly seafood processing, had 4,154 workers but just 32.8 percent were locals.

Mining, which includes the Greens Creek and Kensington mines, had 1,210 total workers, of which 51 percent were nonresidents.

## Southeast Region worker residency and wages by industry

The background of the page features a soft-focus photograph of a mountain range with significant snow cover. A semi-transparent teal band runs horizontally across the middle of the image. Two thin, solid black lines are positioned horizontally, one above and one below the teal band, creating a frame for the central text.

# APPENDIX

# Residency and wages for all industries

## AGRICULTURE, FORESTRY, FISHING, AND HUNTING

Animal Production and Aquaculture	314	233	42.6	\$12,194,496	\$3,821,585	23.9	\$11,386	\$6,359
Crop Production	702	169	19.4	\$12,039,804	\$1,558,198	11.5	\$5,905	\$4,316
Fishing, Hunting and Trapping	174	465	72.8	\$3,153,518	\$12,005,174	79.2	\$8,833	\$13,863
Forestry and Logging	163	245	60.0	\$6,780,609	\$6,549,102	49.1	\$13,400	\$12,994
Support Activities for Agriculture and Forestry	78	31	28.4	\$1,471,644	\$686,852	31.8	\$6,659	\$11,642

## MINING

Mining (except Oil and Gas)	2,547	1,326	34.2	\$225,897,472	\$113,894,799	33.5	\$24,181	\$27,511
Oil and Gas Extraction	2,704	1,110	29.1	\$559,940,913	\$210,501,255	27.3	\$53,923	\$55,250
Support Activities for Mining	4,985	3,118	38.5	\$409,782,737	\$228,586,211	35.8	\$22,322	\$23,083

## UTILITIES

Utilities	2,501	130	4.9	\$206,382,029	\$6,211,981	2.9	\$21,925	\$16,880
