### About This Report

AS 23.20.110 allows for the release of information showing the number of resident and nonresident workers by firm for those Alaska employers who had 20 or more workers during the year. Due to confidentiality restrictions regarding the release of individual company employment data, each company's employment is expressed as a range as opposed to the exact number of employees. In addition, the percentage of total employees that were nonresidents is provided rather than the actual number of nonresident employees.

Residency is calculated by matching workers reported by Alaska employers with the two most recent Permanent Fund Dividend files (2009 and 2010). Workers shown include all workers employed at any time during the year with that employer. If a worker applied for a Permanent Fund Dividend in 2009 or 2010, they are considered residents for purposes of this report. For complete methodological information, please see "Nonresidents Working in Alaska – 2009," available from the Alaska Department of Labor and Workforce Development, Research and Analysis Section at <http://labor.alaska.gov/research/reshire/NONRES.pdf>.
