GUIDE TO CODING

Occupational Codes

Use the six-digit code that *best* describes the activities of the employee. In some cases, the six-digit code has been expanded to identify occupations important to the state. For instance, seafood processing workers are coded as 51-3022.05.

Select a code based on the work *actually performed*--not the code for jobs for which employees might be trained. For example, an employee trained as a Computer Scientist, but working as a Manager, should be coded as a Manager.

Read the detailed descriptions of codes you select to insure you have matched to the employee's duties. Occupations that are similar are often distinguished by key words like *routine*, *non-routine*, *mechanical*, or *hand*.

Supervisors of professional and technical workers are classified with the workers they supervise. Similarly, supervisors, team leaders, and lead workers of sales, service, and production workers who spend at least 20 percent of their time *performing work similar to the workers they supervise* are classified with those workers. Supervisors and first-line managers of sales, service, and production workers who spend more than 80 percent of their time in supervisory activities are coded separately from the people they supervise. If no separate category is indicated, code the supervisor with the workers they oversee.

Search for Occupations by Industry!

The Research and Analysis Section has created industry/occupation cheat sheets. It simplifies the task of finding occupations by weeding out the hundreds of occupations that are not employed in an industry. Go to:

http://live.laborstats.alaska.gov/erg/cheatsheet.cfm

An occupation that combines two different activities is reported with the code for the activity that requires the *highest skill or educational level*. If these levels are the same, report the code for the occupation in which the employee spends the most time.

Employees who changed jobs during a quarter should be reported in their *last* occupation. Do not list the employee more than once on the same Quarterly Contribution Report.

Code apprentices, student teachers, and trainees in the occupation for which they are training.

Identify aides, helpers, and laborers separately if they are *not training* for the occupation in which they are helping, or if their work is truly different.

If the duties of an occupation are not described in the detailed occupations, code the occupation in the appropriate "All other" residual category.

Geographic Codes

Determine where the employee performed work within the state. If you are familiar with the geography of Alaska, you can use the map on page 6 to find the two-digit geographic code. You can also look up the code for the employee's place of work in the regional list of geographic codes starting on page 7. The communities listed regionally appear alphabetically.

Choose the code for the employee's primary work site during the quarter. Often, employees change work sites from one quarter to another. If your employee worked at different locations during the quarter, code for the most recent primary work site. If the employee travels statewide, for example as a sales representative, use the code for the location in which the employee spends the most time.

Do not use the home office of the employer unless that is the location where the employee worked.

Code employees working out of state as "99".

Code employees working in offshore locations, such as floating fish processors or permanent offshore oil drilling operations, as "20".

Code employees who received wages but did not work during the guarter as "00".

Online Alaska Quarterly Contribution Reporting

The Department of Labor has a web site for employers to report wage information for their employees via the Web. Employers can submit Quarterly Contribution Reports and have them received by the State in a 24-hour period. This makes it easier for employers to comply with Alaska State regulation, thereby avoiding penalty and interest payments due to late reporting. It is also easier to code your employee's occupation and geographic codes by using the drop-down boxes included in the Web system.

To file your Alaska Quarterly Contribution Report online, you must have a valid Alaska Employer Account Number, a valid Federal Employer Identification Number (FEIN), and a personal identification number (PIN). To obtain a PIN, go to http://labor.alaska.gov/estax/home.htm and click on the icon for filing your Quarterly Contribution Reports. PINs are automatically assigned and sent within minutes to your e-mail address.

FREQUENTLY ASKED QUESTIONS

How do I find occupation codes?

Search online. Occupation coding help, including industry cheat sheets, is available at: http://live.laborstats.alaska.gov/erg/codehelp.cfm

Search for a job title. In the "Alphabetical Index of Occupation Titles", beginning on page 14, locate a job title that you believe best describes the *highest skilled job* an employee performs. To the right of the job title is the six-digit occupational code. Using this number, refer to the "Detailed Descriptions of Occupations" beginning on page 29 and find the description of the job duties associated with this code. If the description matches your employee's duties, then enter the code in Column 13.

Search for a job code. In the "Numeric List of Occupational Codes", beginning on page 29, you can locate an occupational code and see if the corresponding occupational title matches the *highest skilled* job an employee performs.

How do I use the Occupational Manual?

Find the appropriate occupational and geographic codes for each of your employees following the "Guide to Coding" on page 1. Record the codes in Columns 13 and 14 of your contribution report form.

Can I enter the information online?

Yes. The Department of Labor and Workforce Development has a web site that will make it easier for employers to provide wage information to the State of Alaska. For more information, go to http://labor.alaska.gov/estax/home.htm and click on the icon for filing your Quarterly Contribution Reports.

Why can't I use my NAICS code in Column 14?

The North American Industry Classification System (NAICS) identifies the primary activity of your *business*. The occupational code identifies the primary duties of the *workers* employed in your business. A single occupation, for example an accountant, is found in many different industries.

I use a payroll tax service. Will they report my firm's occupational and geographic codes?

Some payroll tax services will report this information. You will need to contact your tax service directly to arrange for them to report your occupational and geographic codes when they file your quarterly unemployment contribution report.

Why can't I find my employee's job title in your alphabetical list?

Workers within an occupation may have many different job titles. The Alaska Department of Labor and Workforce Development follows the *Standard Occupational Classification 2018* system. We have expanded the list of basic occupations by including many popular job titles. If you cannot find the job title that your firm uses, try looking for an associated or alternative title for that occupation. For example, if you have an employee who works as a Building Custodian, you won't find that job title in the alphabetical listing; however, Custodian, Janitor, and Cleaner are all listed under SOC code 37-2011. Better yet, you can go to our online help page for instructions on how to search for occupation codes online: http://live.laborstats.alaska.gov/erg/codehelp.cfm.

I found the job title for one of my workers, but the duties described are different from the duties the worker actually performs. Why is that?

The job titles that you use to identify occupations within your business may not be the same as the ones used in this manual. If your job title does not match the description of duties, scan nearby codes to find a better match or try an alternative job title.

Why are there no supervisors listed for most professional occupations?

Supervisors of professional and technical workers are classified with the workers they supervise. Similarly, supervisors, team leaders, and lead workers of sales, service and production workers who spend at least 20 percent of their time performing work similar to the workers they supervise are classified with those workers. Those who spend more than 80 percent of their time in supervisory activities are coded separately from the people they supervise. If no separate category is indicated, code the supervisor with the workers they oversee. The key here is the amount of time spent in direct supervision versus the time spent performing tasks similar to the supervised workers.

Where do I code a Consultant?

Consultants are coded with the occupation they perform, for example, a Computer Systems Consultant is reported as a Computer Systems Analyst (15-1121). General business consultants are reported as Management Analysts (13-1111).

Do I have to use a code or can I just write my employee's title in Column 14?

When filing a paper return, a descriptive occupational title is acceptable. We encourage you to use codes, however, because you know the duties of your employees and can therefore assign the most accurate codes. Titles that you report are converted to codes in our office by people who may know very little about your particular industry. If you choose to submit a title, please help improve our accuracy by being as descriptive and complete as possible. For example, Clerk is not descriptive enough because there are 26 different occupation codes for clerks. You need to list the type of clerk, such as Accounting Clerk or Payroll and Timekeeping Clerk. Online filing requires submission of a six-digit occupational code.

What if my employee does two different jobs?

An occupation that combines two different activities is reported with the code for the occupation that requires the highest level of skill or education. If the skill levels are the same, report the occupation in which the employee spends the most time. For employees who change jobs during the quarter because of transfers, promotions, demotions, or reclassifications, report only their *last* occupation.

Where will I find a carpenter's apprentice?

All apprentice workers, including student teachers, are classified with the appropriate skilled trade occupation. In this case, the apprentice is coded the same as a carpenter (47-2031).

How do I code an employee who assists another employee?

Identify aides, helpers, and laborers *separately* if they are not training for the occupation in which they are helping, or if their work is truly different. Code apprentices, student teachers, and trainees in the occupation for which they are training. If the assistant has job duties different from the occupation they support, such as Dental Assistant, code the employee separately. If the assistant's duties are similar to the occupation they support, such as Assistant Manager, classify the assistant in the same category as the manager.

My employee didn't actually work during the quarter. We paid an after-season bonus. What code do I use?

If the employee did not work during the reported quarter, but wages were paid *for any reason*, enter "888888" in Column 13. Record "00" in Column 14 to indicate that the employee did not work. In this case, the employee's actual place of work is not reported.

My employee only works part-time. Does that change the occupation code I use?

No. Part-time employees are reported in the occupation that they perform, regardless of the number of hours they work.

How do I find geographic codes?

Online filing requires submission of a two-digit geographic code. There are three methods for determining the geographic code for your employees:

Search by city or place name within a region. If you know the city or place name where your employees work, turn to the List of Geographic Codes beginning on page 7. Find the location name in the list and enter its two-digit code in Column 14.

Find the employee's place of work on the map. If you are familiar with the geography of Alaska, you can refer to the map on page 6 for the geographic code.

Search by city or place name alphabetically. If you know the city or place name where your employees work, you can search the online geographic coding page at: http://live.laborstats.alaska.gov/erg/geocodes.cfm. The two-digit code is listed next to the place name.

Why do I have to supply a geographic code? You know the address of my company.

Often employees work in locations other than the home office of the employer. The geographic code should indicate the location where the employee actually performed work during the quarter.

I'm in California. My company has employees working in Alaska, but I don't know what they do or where they are.

This is best handled by consulting with your firm's manager or supervisor in Alaska.

My employee travels statewide. What is the correct geographic code?

Choose the code for the location in which the employee spends the most time.

I have a question about my tax rate. Can you help me with that?

Sorry, the Occupational Database Unit deals only with occupation and geographic coding. For questions about your tax rate or other parts of Form TQ01C, you should contact an *Employment Security Tax Specialist* at (907) 465-2757 or toll-free from Alaska or Canada at (888) 448-3527.

What if I still have questions or can't find the proper code for an employee?
