Unemployment Insurance Actuarial Study
and Financial Handbook (Alaska)

Past Issues of Publication Available
in Electronic form (pdf files)
from 1978 to Current Edition

With the release of its 2022 edition (Fall 2023), there is over 45 years of publication history available. The current version of the publication is posted on AkDOLWD's website (as a pdf file). All prior years publications, from 1978, are available (as pdf files) on request.

Prior to 1984, the UI Study and Handbook was published every two years. The biennial editions available are for 1978, 1980, and 1982.

Starting with 1984, annual publications are produced. However, the full study, with narrative, graphs, and all appendices, is only done every other year. In the intervening years, the current data tables are published. This practice continues today.

For **Odd numbered years** (ex 2021): the publication contains the current **data tables**.

For **Even numbered years** (ex 2022): the publication is the **full study**.

To **contact us** and request past editions (to be sent to your e-mail account):
