Appendix 2

COVERED EMPLOYMENT AND WAGES

Description of Data Sources

The topic of Appendix 2 is covered employment and wages. The primary source of data is the Employment, Wages and Contributions Report (ES-202). The ES-202 report is derived from information submitted each quarter to the Alaska Department of Labor by all employers in Alaska (plus estimates for delinquent employers), and reports of civilian employment and wages by the federal government.

The ES-202 report contains information on average monthly employment, total wages paid, and taxable (or non-reimbursable) wages paid. It also reports contributions assessed on taxable employers, but not necessarily paid in the same year. Data is distributed by industry, area, ownership, and tax status.

Average monthly employment is an estimate of employment based on the total number of employees during the pay period which includes the 12th of each month. This estimate represents the number of jobs filled each month, rather than the number of individuals

working during the month. Workers holding more than one job, or who change jobs during the pay period, may be reported by more than one employer.

Wages are actual wages paid during a quarter. Average annual earnings are computed by dividing the total wages paid during the year by the average monthly employment. The results represent average earnings per job, not per worker.

Throughout Appendix 2, industries are classified according to categories established in the Standard Industrial Classification (SIC) Manual. Specific industries, based on 2-digit SIC codes, were selected because of their relevance to the Alaskan economy. The same categories are used for benefit payments in Appendices 3 and 4.

Employment and wage information is also broken out by ownership—private, state government, and local government. In all industry and ownership categories, federal government employment is excluded, as federal and

military employees are not covered under the state unemployment insurance program.

Note that Public Administration employment (SIC codes 91-97) is not directly comparable with employment in State and Local Government ownership. All Public Administration is included within State or Local Government ownership. However, some of the operations included within State or Local Government ownership are listed under industries other than Public Administration, particularly Construction, Transportation, and Services.

Table 2-1
Coverage, 1976-1985

YEAR	NONAGRICULTURAL WAGE AND SALARY EMPLOYMENT	COVERED EMPLOYMENT						NON-COVERED EMPLOYMENT

Appendix 3 BENEFIT STRUCTURE

Description of Data Sources

Appendix 3 covers benefit payments. Information on unemployment claims (except State Interim Benefits) is entered into Alaska's Automated Benefits Payment System (ABPS), and is recorded in the Department of Labor's mainframe computer, in the Benefits file. Three reports extracted from this file—Benefit Payments by Industry and Area, Management Reports, and Claims Activity Reports—form the basis of most benefit payment data used in this publication.

Benefit payments by industry and area are derived from the monthly UC 217 report. The UC 217 report compiles data by 2-digit Standard Industrial Classification (SIC) codes and 3-digit Census Area codes, both in-state and interstate. Payment amounts differ from the amounts shown in Table 4 due to the omission of supplemental payments for weeks previously paid, penalties and interest, and other adjustments.

Benefit payments that are reported statewide and by local office come primarily from the Management Reports (BEPP 2565), which scan the active claimant file weekly, and the Claims Activity Reports (ETA 5-159), which are taken from the weekly and monthly management reports and submitted monthly to the U.S. Department of Labor.

Table 3-2 is developed from the Claimant Characteristics tape, a special compilation of information on all claimants who received unemployment compensation in 1985. Occupations are listed according to classifications in the Dictionary of Occupational Titles, or DOT codes. Ethnic information is based on information voluntarily submitted at the time of initial filing.

Table 3-1 uses data from the Local Area Unemployment Statistics (LAUS), a report produced for the U.S. Department of Labor. The LAUS report estimates the total number of employed and unemployed in the state each month. Data in Table 3-5 comes from the Bureau of Labor Statistics and the U.S. Department of Labor, Division of Actuarial Services.

Table 3-11 contains data on the State Interim Benefits Program. The data source for this table is the Alaska Department of Administration, Division of Finance, Monthly Expenditure Journals, which are accounting records for Alaska's general fund.

SOURCES: Alaska Department of Labor. 1976-1985. Employment, Wages, and Contributions, ES-202 report to the U.S. Department of Labor.

Alaska Department of Labor. 1976-1985. Report of Claims Activities, ETA 5-39 report to the U.S. Department of Labor.

Alaska Department of Labor. 1976-1985. Local Area Unemployment Statistics (LAUS).

Note: Insured unemployment and the insured unemployment rate are for comparison only, and are calculated as the percent of average covered employment filing claims for unemployment compensation during an average week of the year. The total unemployment rate uses labor force data, which includes unemployment with employment.

Appendix 4

TAX STRUCTURE

Description of Data Sources

Appendix 4 focuses on financial transactions, benefit costs, and Alaska's Unemployment Insurance Trust Fund. Appendix 4 derives much of its information from the Benefit Payments by Industry and Area Report (UC-217), and the Employment, Wages, and Contributions Report (ES-202). Several of the tables in Appendix 4 include data reported in Appendices 2 and 3.

The other major source of data for Appendix 4 is the Financial Transactions Summary (ETA 2-112). The ETA 2-112

is a monthly accounting report and is the most accurate source of information on cash flow, although it does not classify data by industry or area.

The information in ETA 2-112 is used to compute Trust Fund balances, tax rates, and benefit costs (Tables 4-1, 4-5, 4-8, and 4-9). The ETA 2-112 is also the source of data on interstate wage combining (Table 4-9), reimbursable employers (Table 4-12), percent of wages (Table 4-15), and deposits and disbursements for all programs (Table 4-3).

Table 4-3 also includes data from the Contributions Operations (ETA 5-81) report to estimate reimbursable contributions between 1981 and 1984. Tables 4-6 and 4-7 list experience ratings by industry, which are reported on the Taxable Wages Within Size of Payroll Codes Array (BRTR 9500), a yearly listing of employers, their wage experience, and their quarterly decline quotients.

Table 4-1
Benefit Cost Rate, 1976-1985

YEAR	TAXABLE EMPLOYMENT			REIMBURSABLE EMPLOYMENT		
	Benefits Paid (\$1,000)	Total Wages (Lagged 1 Yr) (\$1,000)	Benefit Cost Rate	Benefits Paid (\$1,000)	Total Wages (Lagged 1 Yr) (\$1,000)	Benefit Cost Rate

A-rated firms are those which have been subject to the Employment Security Act for more than four quarters and therefore qualify for a rate determination based on their quarterly payroll experience. Employers are assigned a rate class based on their payroll decline experience as compared to all other ratable employers. Employers with a low quarterly payroll decline receive more favorable rates than those employers showing more excessive declines in quarterly employment figures.

B-rated firms are those which have been subject to the Employment Security Act for less than four quarters immediately preceding the computation date and must pay the standard industry tax rate.

C-rated firms are those which fail to pay contributions or file reports on a timely basis and must pay contributions at the highest rate.

21	99.99		1.65	0.5%	5.40%	5.90%

AVERAGE BENEFIT COST RATE (ABCR) = 0.028489

TRUST FUND SOLVENCY ADJUSTMENT (TFSA) = 0.000

EMPLOYEE TAX RATE = $0.18 \times \text{ABCR}$ = 0.5%

EMPLOYER TAX RATE = $(0.82 \times \text{ABCR} \times \text{EF}) + \text{TFSA}$ $(0.023361 \times \text{EF}) + 0.000$

NB: Employer rate calculations range from 0.75% to 0.99% for rate classes 1 to 3 and 3.71% for rate class 21 and 1 other rate classes.

These rates pertain to experience rated employers.

Security Act for more than four quarters qualify for a rate determination based on their quarterly experience. Employers are assigned a rate class based on their payroll decline experience as compared to that of all other ratable employers. Employers with a low quarterly payroll decline receive no rates than those employers showing more excessive declines in quarterly employment figures.
