2.3 Schedule of UI Benefits	19
2.4 Duration Schedule	20
2.5 Payment Data, Regular Benefits (Taxable and Reimbursable), 1982-1991	20
2.6 Average Weekly UI Regular Benefit as a Percentage of Average Weekly Earnings in Covered Employment, 1991	21
2.7 Payment Data, UI Extended Benefits, 1982-1991	22
2.8 Payment Data, UI State Supplemental Benefits, 1982-1991	23
2.9 UI Regular Benefit Payments (Taxable and Reimbursable) by Industry - Intrastate, 1982-1991	24
2.10 UI Regular Benefit Payments (Taxable and Reimbursable) by Industry - Interstate, 1982-1991	26
2.11 UI Regular Benefit Payments (Taxable and Reimbursable) by Industry - Total, 1982-1991	28
2.12 UI Regular Benefit Payments (Taxable and Reimbursable) by Industry - Interstate as a Percentage of Total, (1982-1991)	30
2.13 UI Regular Benefit Payments by Local Office, 1982-1991	31
2.14 Amount of UI Benefit Payments by Census Area, 1991	33
2.15 UI Regular Benefit Payments by Alaska to Interstate Claimants by State, 1982-1991	34
2.16 Payment of Dependents' Benefits, 1982-1991	35
2.17 Average Weekly Percentage of Unemployed Receiving UI Benefits, 1991	36
Chapter 3. Alaska's UI Benefit Financing System	37
Tables	
3.1 Benefit Cost Rate, 1982-1991	37
3.2 Benefit Cost Rates by Industry, 1991	38
3.3 Trust Fund Deposits and Disbursements, 1982-1991	39
3.4 Tax Base, Average Employer and Employee Tax Rates and Ratio of Taxable to Total Wages, 1982-1991	40
3.5 Employer Accounts and Average Tax Rates by Rate Type and Industry	41
3.6 UI Tax Rate Calculations and Tax Rates by Rate Class, 1991	42
3.7 Administrative Costs, 1982-1991	43
3.8 Collections, UI Regular Benefits Paid - Reimbursable Employment, 1982-1991	44
3.9 Benefits Paid, Contributions Assessed and Ratio of Benefits to Contributions - Taxable Employment, 1982-1991	45
3.10 Collections, Benefits Paid, Trust Fund Reserves and Average Employer Tax Rate as Percentages of Payroll, 1982-1991	46
3.11 Distribution of Covered Payroll, Taxes Assessed and Benefits Paid by Industry, 1991	47
3.12 Percentage Distribution of Taxes Assessed and Benefits Paid by Industry, 1991	48
3.13 UI Trust Fund Model, Forecasts through 1997	49
Appendix. Data Sources and Limitations	51

Preface

Every other year the Department of Labor (DOL) publishes the *Unemployment Insurance Actuarial Study & Financial Handbook*. The last Handbook was published in December 1991. The next will be published in December 1993.

During those months which fall between publication of the Handbook, DOL staff receive numerous requests for updated information contained in the Handbook chapters. In order to satisfy the requests, DOL publishes in the alternating years an updated version of the tables in Chapters 1, 2 and 3. This updated version is entitled *UI Actuarial Handbook Updated Tables, Calendar Year 1991*. This is the fourth such issue of this publication;

Users of this publication might refer to the complete Handbook for: a description of technical terms used, a short discussion on the history of Alaska unemployment insurance legislation, and an explanation of the state's current unemployment insurance system.

Those readers whose questions are not answered by information found in the complete Handbook can contact the authors of these publications. The principal authors, Thom Wylie and Jim Wilson, are employed in the Juneau-based Research & Analysis Section of the Alaska Department of Labor.

UI Covered Employment & Wages

Chapter 1

Nonagricultural Wage and Salary Employment, Covered and Noncovered, 1982-1991

Table 1.1

Year	Total Nonagricultural Wage and Salary Employment	Insured through State UI Programs	% of Total	Insured through Federal UI Programs	% of Total	Not Insured by UI Programs	% of Total
1982	200,537	180,674	90.1	17,643	8.8	2,220	1.1
1983	212,851	192,998	90.7	17,741	8.3	2,112	1.0
1984	222,491	201,868	90.7	18,075	8.1	2,548	1.1
1985	228,026	207,689	91.1	17,526	7.7	2,811	1.2
1986	218,474	197,806	90.5	17,592	8.1	3,076	1.4
1987	208,030	187,025	89.9	17,886	8.6	3,119	1.5
1988	212,057	191,035	90.1	17,867	8.4	3,155	1.5
1989	224,810	203,423	90.5	18,218	8.1	3,169	1.4
1990	236,543	214,644	90.7	18,729	7.9	3,170	1.3
1991	240,873	218,367	90.7	18,922	7.9	3,584	1.5

Note: Percentages may not add up to 100% due to rounding.

Unemployment Insurance Benefit Payments

Chapter 2

Unemployment, 1982-1991

Table 2.1

Year	Total Labor Force	Total Unem- ployment	Total Unem- ployment Rate (TUR)%	Covered Employ- ment	Insured Unem- ployment	Insured Unem- ployment Rate (IUR)%	% Ratio IUR to TUR
1982	211,000	21,000	10.0	180,674	11,111	6.1	61.8
1983	234,000	24,000	10.3	192,998	11,446	5.9	57.8
1984	247,000	25,000	10.1	201,868	11,907	5.9	58.3
1985	250,000	24,000	9.6	207,689	14,224	6.8	71.3
1986	257,000	28,000	10.9	197,806	16,620	8.4	77.1
1987	249,000	27,000	10.8	187,025	13,301	7.1	65.6
1988	250,000	23,000	9.2	191,035	10,485	5.5	59.7
1989	253,000	17,000	6.7	203,423	9,056	4.5	66.3
1990	257,000	18,000	7.0	214,644	11,170	5.2	74.3
1991	258,000	22,000	8.5	218,367	13,237	6.1	71.1

Note: Insured unemployment and the insured unemployment rate are for comparison only, and are calculated as the percent of average covered employment filing claims for unemployment compensation during an average week of the year. The Total Unemployment Rate (TUR) uses labor force data, which includes unemployment with employment.

* Estimated from January 1981 through June 1984 because the reporting system did not distinguish between collections from contributing employers and those from reimbursable employers

1/ FSC – Federal Supplemental Compensation: October, 1982 – March, 1985

EUC – Emergency Unemployment Compensation: November 1991 – Date

2/ Net collections of penalties, interest, and fines

3/ CETA, PSE, DUA, TRA, SUA, transfer to Training and Building fund, prior year refunds, child support withholding transfers, federal UCFE and UCX benefits and receipts, federal share of regular benefits

4/ Deposits from all sources including federal and all disbursements made to claimants

5/ Amount available for benefits in trust fund on December 31

Notes: A-rated firms are those which have been subject to the Employment Security Act for more than four quarters and therefore qualify for a rate determination based on their quarterly payroll experience. Employers are assigned a rate class based on their payroll decline experience as compared to all other ratable employers. Employers with a low quarterly payroll decline receive more favorable rates than those employers showing more excessive declines in quarterly payroll figures.

B-rated firms are those which have been subject to the Employment Security Act for less than four quarters immediately preceding the computation date and must pay the standard industry tax rate.

C-rated firms are those which fail to pay contributions or file reports on a timely basis and must pay contributions at the highest rate.

Percentages may not add up to 100% due to rounding.

Data Sources and Limitations

Appendix

Limitations of Data

The data in this publication are derived from a number of different sources, each with their own limitations. Much of the data comes from reports that are produced directly from computer files in the Alaska Department of Labor's mainframe computer. While the reports come from the same source, data that appear similar are not necessarily comparable, because the programs that produce the reports are run at different times and using different selection criteria.

Consequently, some of the tables in this publication are not directly comparable. For instance, Table 2.13 reports payment data by UI local office, while Tables 2.9-2.12 report the same data by industry grouping. The totals are not the same, however, because Table 2.13 comes from the BEPP 2565 Monthly Management Report, which scans the file each week, while Tables 2.9-2.12 come from the UC-217 report, which scans the file once each month; supplemental payments for weeks previously paid, overpayments, and other adjustments made during the month will cause the totals to differ slightly. Similarly, Table 2.13 differs slightly from Table 2.14 for the same reasons, even though both report benefit payments by area.

There will be similar differences whenever two tables are derived from different sources. Each table includes the data source at the bottom of the page. The reader should be cautious about other limitations as well. Percentages occasionally do not sum to 100% due to rounding error when using only one or two digits. The data is reported to the full dollar amount whenever possible throughout the publication, but the dollar amounts in some tables are rounded to the nearest \$1,000 because of space limitations. Finally, industry groupings include subcategories for manufacturing and mining; these must be subtracted when summing the columns.

CHAPTER 1: UI Covered Employment and Wages

Chapter 1 provides information on employment, payroll, and earnings. The major source of data is the Employment, Wages, and Contributions report (ES-202), a report submitted to the U.S. Department of Labor, Bureau of Labor Statistics.

The information used in ES-202 is derived from quarterly payroll and employment information submitted to the Alaska Department of Labor by all employers in Alaska. The information is also derived from Alaska Department of Labor estimates for delinquent employers reports.

ES-202 includes all employers covered by Alaska's unemployment insurance system. It also includes all Alaska employers' average monthly employment, total payroll, and taxable payroll. Additionally, ES-202 includes taxable employers' contributions assessed upon them by the state and paid into the UI Trust Fund.

All data found in the chapters are broken out by industry, area, ownership, and tax status.

'Average monthly employment' is an estimate of employment based on actual employment data covering that pay period which includes the 12th of each month. It is an estimate of the number of jobs filled each month. Caution must be used when deriving annual earnings from these figures, as they represent average annual earnings per job, not per worker. Payroll is the actual total payroll during each quarter.

Throughout Chapter 1, industries are broken out according to categories established in the Standard Industrial Classification (SIC) Manual. Specific industries, based on 2-digit SIC codes, were selected because of their relevance to the Alaskan economy. The same categories are used for benefit payments in chapters two and three. Employment, payroll, and earnings information is also broken out by ownership—private, state government, and local government. In all industry and ownership categories, federal government employment is excluded, as federal employees and members of the military are not covered under the state unemployment insurance program.

Public administration (SIC codes 91-97) is not directly comparable with state and local government ownership. While all of public administration employment is included in either state or local government, the opposite is not true; some of the operations included under state or local government ownership are listed under other industries than public administration, particularly construction, transportation, and services.

CHAPTER 2: UI Benefit Payments

Chapter 2 provides information on benefit payments. Information on unemployment claims is entered into Alaska's Benefits Unemployment Compensation System (BUC\$), and is recorded in the Department of Labor's (DOL) computer. Extracted from this file are several reports, three of which form the basis of most benefit payment data used in this publication.

Payments by industry and area, Tables 2.9-2.12 and Tables 2.14-2.15, are derived from the UC-217 report. The UC-217 report is a monthly compilation of data by 2-digit SIC codes and 3-digit census area codes. Payment amounts differ from the amounts shown in Table 2.3 due to the omission of supplemental payments for weeks previously paid, penalties and interest, and other adjustments.

Two reports provide information for the payment data on Tables 2.5-2.8 and Tables 2.13, 2.14, and 2.16. These data are derived from the Alaska DOL's BEPP 2565 Monthly Management report, which scans weekly the department's active claimant file. Some of the data are also derived from the U.S. Department of Labor's ETA 5-159 Claims Activity report, which is taken from the weekly and monthly management reports.

Data in Table 2.2 is derived from the 'Claimant Characteristics' computer tape. This tape is a special compilation of information on all claimants who received unemployment compensation in 1991. Occupations are listed according to classifications in the Dictionary of Occupational Titles (or DOT codes). Ethnic information is based on information voluntarily submitted at the time of initial filing.

Table 2.1 uses data from the Local Area Unemployment Statistics (LAUS), a DOL report produced for the U.S. Department of Labor. This report estimates the total number of employed and unemployed in the state each month.

Table 2.7 uses employment data from the yearly ES-202 report from the Bureau of Labor Statistics. It also uses payment data from the yearly ETA 5-159 report on all states compiled by the U.S. Department of Labor, Division of Actuarial Services.

Table 2.17 is derived from the UI Data Summary, formerly called the QUICC Report, a quarterly publication of key UI information published by the U.S. Department of Labor, Division of Actuarial Services.

CHAPTER 3: Alaska's UI Benefit Financing System

Chapter 3 discusses financial transactions, Alaska's UI Trust Fund, and Alaska's benefit financing structure. One of the major subjects of the chapter is benefit costs. Therefore, it draws heavily from the Alaska Department of Labor's Benefit Payments by Industry and Area (UC 217) report and the ES-202 quarterly reports (the DOL's Employment, Wages, and Contributions report). And, in fact, several of the Tables directly reproduce data reported in chapters one and two.

The other major source of data for chapter 3 is the Financial Transactions Summary (ETA 2-112). This is a monthly accounting report produced by DOL. It is the most accurate source of information on financial transactions and cash flow. Its major limitation is that it does not break out data by industry or area. It is used to compute UI tax rates (see Tables 3.4 and 3.6) and benefit costs and benefit cost rates (Tables 3.1, 3.2 and 3.6). It is also the source for UI Trust Fund balances (Tables 3.3, 3.6 and 3.10), deposits and disbursements for all programs (Table 3.3), as well as interstate wage combining, reimbursable employers (Table 3.8), and collections, benefits and trust fund balance as a percentage of wages (see Table 3.4, 3.10, and 3.11).

Table 3.3 also uses data from the DOL Contributions Operations (ETA 581) report in order to estimate reimbursable contributions between 1981 and 1984.

Table 3.5 lists experience ratings by industry, which are reported on the BRTR 9500 Array, Taxable Wages Within Size of Payroll Codes -- a yearly listing of employers, their payroll experience, and their quarterly decline quotients. This information is also produced by the Alaska Department of Labor.

Table 3.13 is produced by the Department of Labor, Research and Analysis, using a variety of data sources that are used in this publication, and run through a forecasting model produced by Research and Analysis.
